SUMMARY

Frontend Software Engineer with 3+ years of experience building scalable, production-grade React/Next.js applications for enterprise clients. Strong focus on component architecture, design systems, performance optimization, and CMS-driven content platforms (Builder.io, Amplience). Proven track record of improving deployment reliability, accelerating page performance, and delivering UI/UX features for high-traffic sites.

SKILLS

React, NextJs, JavaScript, TypeScript, TailwindCSS, Material UI, Framer-motion, D3.js, Figma, Builder.io, Cursor, Node.js

EXPERIENCE

New Elevation

Dec 2021 – Dec 2025

Software Engineer

Remote

- Developed and maintained production React and Next.js applications for multiple client websites, collaborating closely with designers and stakeholders to deliver scalable UI components and page systems.
- Implemented cross-site CMS migration strategy from Amplience to Builder.io, establishing component-based content models and improving scalability across 20+ production sites
- Partnered with QA and content teams to diagnose issues and deploy fixes across production environments.

Akorbi Incorporated

Mar 2020 – Nov 2020

Research Assistant

Sunnyvale, California

- Expedited conduction of technical data collection for product software development, speeding up testing timeline by 40%
- Developed and constructed new product tests for multitude of edge cases, enabling for weekly software adjustments.
- Onboarded incoming team members with project objectives and current lab procedures to ensure rapid crew transitions
